

# Minimize Delivery Risks & Maximize Project Value with ESG-Aligned Capital Project Delivery

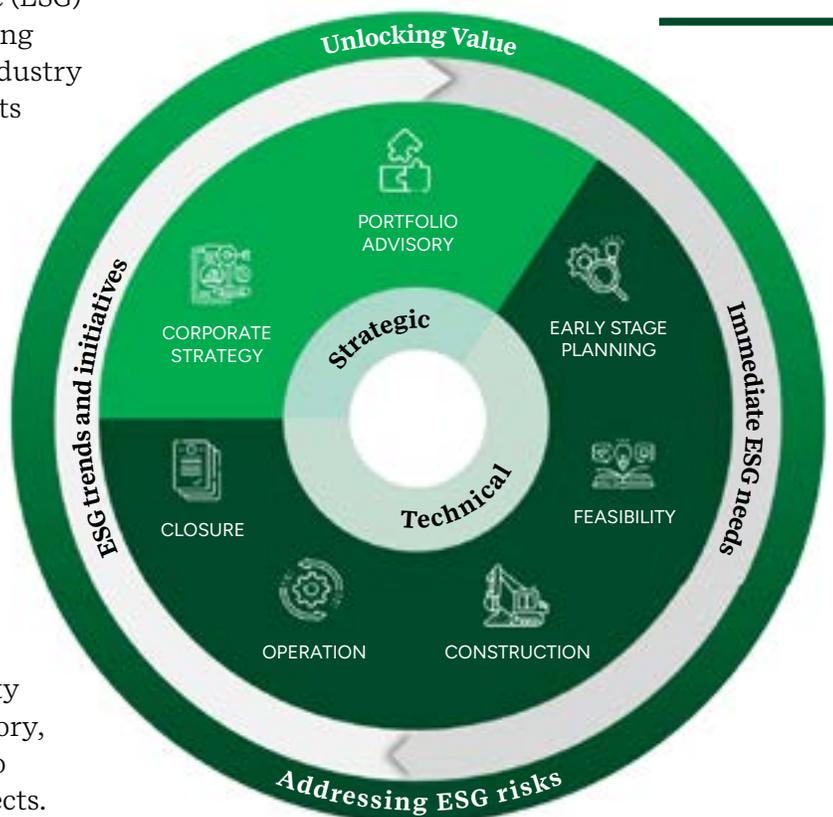

Navigating the energy transition often comes with unforeseen challenges that can delay and cause costly disruptions to projects at various stages.

ERM HAS BEEN A TRUSTED ADVISOR IN CAPITAL PROJECT DELIVERY FOR 50+ YEARS, FROM STRATEGY TO IMPLEMENTATION.

As global Environmental, Social, and Governance (ESG) awareness grows, capital projects face new growing expectations that require dedicated resources, industry experience, and technical expertise. These projects are operationally complex, with many factors that require strategic alignment with multiple stakeholders and integrated solutions.

**Strategic integration of ESG in decision-making goes beyond risk management and enables value creation for capital projects.**

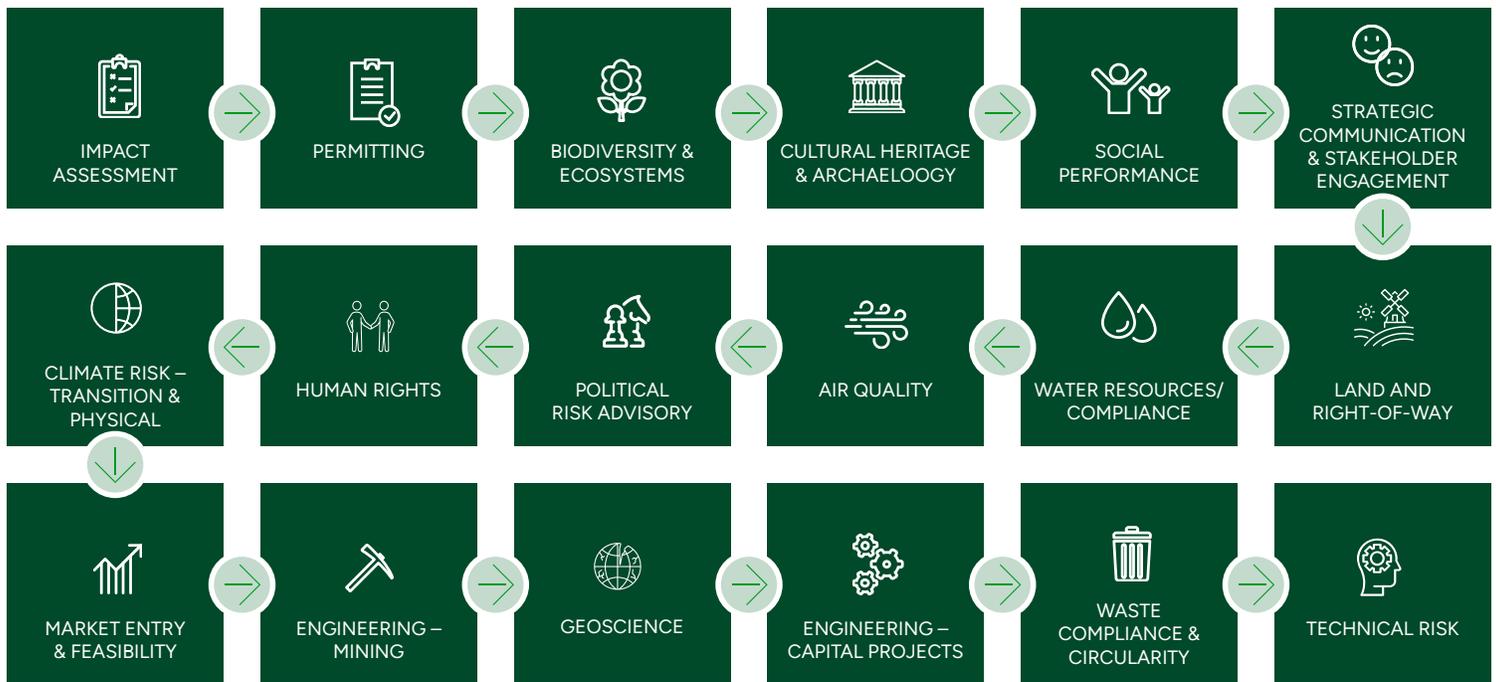

ERM's global footprint coupled with our technical expertise enables your business to meaningfully deliver your capital projects by engaging with local communities and critical stakeholders throughout the value chain. Our partnership approach means we work with our clients every step of the way to seamlessly connect and support their corporate sustainability goals. Whether the impacts are strategic, regulatory, or technical, ERM has the in-house capabilities to provide solutions and optimize your capital projects.

MINIMIZE DELIVERY RISKS AND CREATE VALUE BY PROACTIVELY EMBEDDING CURRENT AND EMERGING ESG TOPICS AT THE OPTIMAL POINTS IN YOUR CAPITAL PROJECT'S LIFE CYCLE.

**Protect your company's reputation and resources by proactively identifying and managing ESG risks**

ERM provides solutions to help our clients reduce risks, ensure compliance, and streamline their capital projects. Our comprehensive approach to integrating ESG into capital projects enables our clients to unlock opportunities and address those growing expectations placed on capital projects by regulators, policy makers, shareholders, and communities. By minimizing delivery risks, we're able to help create value by proactively embedding current and emerging ESG topics at the optimal points in your capital project's lifecycle to ensure on time and on budget delivery.

**Impactful insights at every project phase to inform and drive smart business decisions**

Beyond our breadth of in-house technical expertise and multi-industry experience, ERM uses proprietary digital solutions and tools to capture and report important data. We integrate this into our implementation process at each asset level using leading frameworks to address ESG risks. From developing strategy and advisory planning, to feasibility, construction, operation and closure, our dedicated teams enable project success across your entire value chain.

No matter where you are on this journey, ERM provides strategic, practical advice and partnership across every stage of the capital project delivery – built on a foundation of technical expertise that is robust across geographies, industries and ESG topics. Connect with us to create value in your capital projects.
